More jobs from this company

The Company

This is a business that has been at the forefront of providing Cyber Security solutions on a global scale to businesses across all industries for the past 30 years.

Due to the continued demand for Cyber solutions on a global basis, they continue to grow to meet demand, with the ANZ region being a key focus for them.

In Australia, they have a team of over 150 which consist of developers, engineers, cyber solutions consultants and of course, an experienced sales team.

On a wider scale, the business employs some 20,000 people globally with their solutions being used by many Enterprise Companies, Banks and Government bodies.

Their solutions cover all main facets of Cyber Security, providing an all-in-one solution.

The Culture

This company scores highly on Glassdoor for overall staff happiness both inside &outside of Australia. What staff like about the business is the flexibility on offer (you're only required to be in the office 1 day per week), ongoing development and training, approachable managers and a lack of red-tape when it comes to quick decision making.

Futher to this, they offer 6 weeks annual leave, 11% superannuation and personal health & life insurance.

Their offices are very well fitout in a modern CBD location.

The Role

This is a project-based role where you will be scrutinising the cyber security of this companies' clientele, delivering test strategies for attacking and assessing complex systems, as well as presenting TTPs for opportunistic, advanced and sophisticated attacks based off client requirements.

Creating clear and concise situation reports and activity summaries, with suggestions on what can be implemented to safeguard security.

This company specialises in Penetration Testing, with a full-development training program, enabling you to continue picking up new skills and understanding the latest cyber attacking strategies.

Your Experience

To be successful in this role, you will be a mid-level Red Team Penetration Tester that has worked on a variety of projects in a multitude of industry verticals.

- Experience in penetration testing, computer network attack (CNA), and/or computer network defense (CND).
- Experience with basic scripting languages including bash and/or PowerShell.
- Experience with at least one object-oriented programming language (Python, Ruby, Java, etc.).

The Salary –

Up to $100,000 + Super & performance-based bonuses.

If this opportunity sounds of interest, please apply or contact Ben Stanley-Clarke on 0422 684 291 / ben.stanley@streamtalent.com for more information.
